SECRET 25X1 -2-25X1 All of the trucks had drivers wearing black-bordered blue epaulets. 4. On 2 March, 7 large railroad tank cars were shunted to the airfield. These tank cars were not seen on the landing field near the fuel dumps on 3 March, although they were emptied in the course of 25X1 the day. On 15 March, 3 railroad tank cars were seen on the spur track. 3 25X1 Comment. The unconfirmed shipment on 10 March was apparently loaded with an air force construction unit. The mission of this unit, possibly in connection with the arrival of runway mats, has not been determined. 25X1 2. Comment. For sketches of runway mats, see innexes 1 and 2. 3. Comment. According to available information, the fuel dumps are located in the southern section of the field. These dumps are apparently being filled.
